## EXPERIENCE

### Expedia Group

Chicago, IL | August 2023 - Present

#### Software Development Engineer II (Promoted March 2026)

*Event Management & Notification Team, Observability Org*

##### Incident & Event Search Console

- Designed and built an internal incident search console enabling operators to query millions of production incidents by keyword, time range, and dynamic filters with real-time result counts.
- Built a React/TypeScript UI of roughly 5,500 lines with URL-based state management for shareable, deep-linkable operational searches.
- Architected an SNS/SQS/Lambda streaming pipeline to sync DynamoDB incident data into PostgreSQL with optimized schemas, indexes, and partitioning.

##### AI-Powered Incident Summarization

- Built AI-powered incident summarization that aggregates correlated events and generates incident context from multiple event logs.

##### Infrastructure & Integrations

- Owned the PagerDuty-to-Datadog On-Call migration across event pipelines, APIs, database schemas, and the self-service event catalog UI.
- Migrated 8,000+ PagerDuty-backed event configurations to Datadog On-Call without manual action from owning teams, and updated event creation workflows to support new Datadog routing configs.
- Configured disaster recovery infrastructure in AWS across API services, database tables, and MemoryDB clusters.

## PROJECTS

### Content Engine

content-engine.dev

- Building an AI agent for content creation that converts natural language prompts into short-form videos. Agent is equipped with tools for media generation, video composition, and social media publishing.

### Rewinded

rewinded.app

- Built iOS app transforming camera rolls into shareable visual stories with real-time collaboration, custom masonry layouts, drag-and-drop interactions, and shareable web previews.

### MindMend

getmindmend.com

- Built iOS wellness app with an AI coach using GPT-4o function calling, habit/journal context retrieval, voice dictation, and natural language habit logging.

### Caravan Trip Plan

caravan-trip-plan.vercel.app

- Architected platform with 50+ Lambda scrapers, reverse-engineered booking APIs, async task queues, result caching, Stripe checkout, and guest-to-user migration.

## EDUCATION

### University of Michigan - B.S. Computer Science, Minor in Applied Statistics

Ann Arbor, MI | August 2019 - May 2023 | GPA: 3.62

- Regents Merit Scholar; LSA Honors College for 2 years; Club Tennis #1 Singles.

## SKILLS

**Languages** Python, TypeScript, JavaScript, Swift, SQL, Java, C++

**Frontend/Mobile** React, Next.js, SwiftUI, Flutter, React Flow

**Backend/Infra** Node.js, Flask, AWS Lambda, S3, CloudWatch, SNS/SQS, Aurora, DynamoDB, MemoryDB, Docker, Redis, Kubernetes

**Tools/Data/AI** PostgreSQL, Convex, Supabase, Firebase, Clerk, Stripe, Datadog, Splunk, CI/CD, LLM APIs, MCP/tool integrations, multimodal AI providers, model orchestration

## ADDITIONAL

- Shipped five apps to the App Store.
- Top 100 U.S. junior tennis player for high school grade; state finalist and 4-time regional champion.
