EXPERIENCE

Expedia Group - Software Development Engineer II

Chicago, IL | August 2023 - Present | Promoted March 2026 | Event Management & Notification Team, Observability Org

- Designed and built an internal incident search console enabling operators to query millions of production incidents by keyword, time range, and dynamic filters with real-time result counts.
- Architected an SNS/SQS/Lambda streaming pipeline to sync DynamoDB incident data into PostgreSQL with optimized schemas, indexes, and partitioning.
- Built a React/TypeScript UI of roughly 5,500 lines with URL-based state management for shareable, deep-linkable operational searches.
- Integrated Datadog On-Call into Expedia's event management system, enabling automated incident routing and escalation.
- Built AI-powered incident summarization that aggregates correlated events and generates incident context from multiple event logs.
- Configured disaster recovery infrastructure in AWS across API services, database tables, and MemoryDB clusters.

PROJECTS

Content Engine

In-progress full-stack AI content automation studio

- Building a React/TypeScript workflow canvas for composing reusable AI content pipelines with typed nodes, port validation, execution state, artifact storage, and run debugging.
- Implemented Convex backend models for brands, personas, creative assets, workflows, workflow runs, node states, artifacts, provider connections, publishing plans, and metrics.
- Built provider abstractions for AI generation and publishing integrations, plus MCP-style API tools for external agents to inspect, edit, validate, and run workflows.

Rewinded

rewinded.app

- Built iOS app transforming camera rolls into shareable visual stories with real-time collaboration via WebSocket subscriptions.
- Implemented custom masonry layout algorithm with drag-and-drop interactions and auto-generated shareable web previews.

MindMend

getmindmend.com

- Built iOS wellness app with an AI coach using GPT-4o function calling to fetch habits and journal entries for personalized insights.
- Implemented voice dictation with natural language parsing for automatic habit logging.

Caravan Trip Plan

caravan-trip-plan.vercel.app

- Architected microservices platform with 50+ Lambda scrapers fetching real-time campground availability via reverse-engineered booking APIs.
- Built async task queuing with result caching and Stripe checkout with guest-to-user migration.

DreamDex

dreamdexapp.com

- Built cross-platform dream journaling app with AI-generated imagery, emotional analysis, voice-to-text recording, and lucidity scoring.

EDUCATION

University of Michigan - B.S. Computer Science, Minor in Applied Statistics

Ann Arbor, MI | August 2019 - May 2023 | GPA: 3.62

- Regents Merit Scholar; LSA Honors College for 2 years; Club Tennis #1 Singles.

SKILLS

Languages	Python, TypeScript, JavaScript, Swift, SQL, Java, C++
Frontend/Mobile	React, Next.js, SwiftUI, Flutter, React Flow
Backend/Infra	Node.js, Flask, AWS Lambda, S3, CloudWatch, SNS/SQS, Aurora, DynamoDB, MemoryDB, Docker, Redis, Kubernetes
Tools/Data/AI	PostgreSQL, Convex, Supabase, Firebase, Clerk, Stripe, Datadog, Splunk, CI/CD, OpenAI GPT-4o, Google Gemini

ADDITIONAL

- Shipped five apps to the App Store.
- Top 100 U.S. junior tennis player for high school grade; state finalist and 4-time regional champion.
